SUMMARY

Senior Java Engineer / Module Lead with around 10 years of experience building scalable backend systems in banking, payments, and enterprise platforms. Strong in Java (8/11/14/17), Spring Boot, distributed systems, event-driven architecture (Kafka/AMQ), caching (Redis/Aerospike), API gateways, and AWS. Proven track record in performance optimization, production reliability, and end-to-end ownership. Experience in mentoring engineers and working closely with stakeholders to deliver high-quality systems.

KEY ACHIEVEMENTS

- Reduced API latency by 30–40% via query optimization and Redis caching
- Designed Kafka-based pipelines enabling asynchronous and decoupled service communication
- Led backend modules with end-to-end ownership from design to production, including performance tuning and incident handling
- Mentored engineers, led code/design reviews, and collaborated with stakeholders to ensure high-quality and reliable system delivery
- Built RAG-based internal chatbot (POC) using Spring AI and vector search for document retrieval

TECHNICAL SKILLS

Languages: Java (8, 11, 14, 17), OOP, Collections, Exception Handling, Streams, Functional Programming

Frameworks: Spring Boot, Spring MVC, Spring Security (JWT/OAuth2), Spring Data JPA, Hibernate, Spring Batch, Spring Cloud

Architecture: Microservices, Clean Architecture, DDD, Event-Driven Systems, RESTful API Design

Messaging & Integration: Kafka, AMQ, Kong API Gateway

Cloud/DevOps/Version Control: AWS, Docker, Jenkins, GoCD, Maven, Gradle, CI/CD, Observability (Splunk), Git, SVN

Databases/Caching: PostgreSQL, MySQL, Oracle, Redis, Aerospike

Testing: JUnit 5, Mockito, Cucumber, Integration Testing

Frontend (Basics): Angular 8, HTML5, CSS3, Bootstrap

AI Tools / GenAI Framework (Basics): RAG, Lang Chain, Vector DB concepts, Spring AI, GitHub Copilot, Cursor AI

PROFESSIONAL EXPERIENCE

Senior Engineer (Java / Backend) | Iris Software, Gurugram | Jul 2025 – Present

- Migrated applications to AWS EKS, enabling containerized deployments and improving scalability and deployment consistency.
- Built RAG-based internal chatbot (POC) using Spring AI and vector search
- Designed ingestion and retrieval pipeline for semantic search
- Developed REST APIs with multi-turn conversation and citation support.

Module Lead / Senior Java Developer | Impetus Technologies, Gurugram | Jan 2024 – Jul 2025

- Led design and delivery of backend services for an enterprise **Model Governance platform**, owning modules end-to-end from requirement analysis to production release.
- Implemented model workflows, approvals, and audit tracking APIs with strong validation, error handling, and role-based access controls.
- Improved API response times by optimizing DB queries and introducing caching where applicable; ensured high reliability under concurrent usage.
- Collaborated with stakeholders & Mentored engineers via design reviews, code reviews, and debugging sessions; enforced engineering standards and Definition of Done.

Consultant (Senior Java Developer) | Xebia, Gurugram | Oct 2022 – Jan 2024

- Owned critical backend modules for payments and inventory systems, contributing to architecture and integration design
- Built secure REST APIs with JWT-based authentication and standardized error handling
- Designed and implemented Kafka-based asynchronous workflows, improving system decoupling and throughput
- Improved API performance by introducing Aerospike caching and optimizing API design.

Senior Analyst (Java Developer) | Accenture, Gurugram | Jun 2021 – Oct 2022

- Developed microservices for banking/payment transaction automation with focus on reliability, scalability, and maintainability.
- Implemented batch workflows and Kafka-driven event processing for transaction lifecycle automation.
- Improved release stability by expanding unit/integration tests and aligning test suites with business scenarios (Cucumber).

Project Engineer (Java Developer) | Wipro, Noida | Nov 2017 – May 2021

- Delivered backend services for billing, credit collection, and postpaid payment systems; ensured functional accuracy for financial operations.
- Developed secure APIs and scheduled batch jobs for recurring billing and collection workflows.
- Supported production incidents with root-cause analysis and corrective actions to improve service uptime.
- Collaborated with stakeholders for requirement clarification and suggested design improvements for long-term maintainability

Software Developer (.Net Developer) | Freelance Work | Jul 2016 – Sep 2017

- Developed and maintained web applications for MLM and School Management systems using ASP.NET and C#
- Designed and implemented user interfaces with Bootstrap and HTML for responsive, user-friendly experiences
- Built and integrated backend modules for user management, transactions, and reporting
- Wrote optimised SQL queries and handled database interactions for data consistency and performance
- Debugged production issues and performed regular enhancements based on client requirements
- Collaborated with team members to deliver features within timelines and ensured code quality through basic reviews

PROJECTS

Clarify - Enterprise Policy Assistant – RAG Chatbot for Company Policies | Aug, 2025 – Jan, 2025

Brief: An internal RAG (Retrieval-Augmented Generation) system that enables employees to upload company policy documents (HR policies, compliance, SOPs, travel policy, IT guidelines) and chat with the knowledge base to get accurate answers with citations.

- Designed end-to-end pipeline: document ingestion → chunking → embeddings → semantic retrieval
- Implemented Top-K similarity search using vector database (PGVector)
- Developed REST APIs with multi-turn conversation and context handling
- Added source citation mechanism to improve response reliability

Tech Stack: Java 17, Spring Boot 3.x, Spring AI, Lang Chain, Ollama (Local LLM), RAG Pipeline (Chunking + Embeddings + Retrieval), Vector DB (PG Vector), PostgreSQL, Redis Cache, REST APIs, Spring Security (JWT), Maven, JUnit 5, Mockito, Angular

Omni – Model Governance Platform | Client: American Express | Role: Module Lead | Jan 2024 – Apr 2025

Brief: This project aims to enable modelers and other stakeholders to perform the governance actions to get model certified and put on artifacts and findings to it.

- Led backend services for model certification workflows and governance processes
- Designed APIs for artifact management, approvals, and audit tracking.
- Built scalable services ensuring compliance, traceability, and reliability
- Drove code quality and delivery standards through code/design reviews, mentoring engineers, and close collaboration with stakeholders

Tech Stack: Java 11, Vert.x, Spring Boot, Spring Data JPA, PostgreSQL, JUnit 5, Mockito, Angular

Mitra App – Retailer Inventory Management | Client: Airtel Payment Bank | Role: Senior Java Developer | Mar 2023 – Dec 2023

Brief: This project aims to enable retailers to order and manage cards inventory from the payments bank and distribute cards to customers.

Tech Stack: Java 8, Spring Boot, Spring Batch, Spring Security (JWT), Kafka, Aerospike, Oracle, Kong Gateway, JUnit 5, Mockito

- Developed microservices for inventory ordering and card distribution workflows with Kafka-based processing.
- Introduced caching and optimized queries to improve throughput and reduce latency under peak load.
- Secured APIs using JWT authentication and implemented batch jobs for operational automation.

ADDITIONAL PROJECTS (SUMMARY)

- **Vikki – Payment Transfer System (Galaxy FinX) – Oct 2022-Feb 2023**
Built backend services for inter/intrabank payments with validation and reliability
- **BNPL Initiative (National Australia Bank) – Jun 2021 – Sep 2022**
Developed transaction automation services and contributed to BNPL workflow integration
- **Credit Collection System (Telenor) – Jul 2019 – May 2021**
Built billing and collection services with batch processing and production support
- **Shipping Reporting System (FedEx) – Dec 2017 – Jun 2019**
Developed reporting services and optimized query performance

EDUCATION

- Master of Computer Applications (MCA) – APJ Abdul Kalam Technical University | 2014 – 2016
- Bachelor of Computer Applications (BCA) – Mahatma Jyotiba Phule Rohilkhand University | 2011 – 2014

AWARDS

- Star of the Month – Impetus (Sep 2024)
- GEM Award – Xebia (Jan 2023)

LANGUAGES

Hindi (Native) | English (Professional)
