

Narendra Kumar Gangwar

Gurugram, India • narendratarget@gmail.com • +91-9627950018 • [linkedin.com/in/onenarendra](https://www.linkedin.com/in/onenarendra)

Senior Engineer / Lead with 10 years of experience designing, developing, and supporting scalable distributed systems across banking, payments, telecom, and enterprise domains. Expertise in Java, Spring Boot, Microservices, Kafka, Redis, Aerospike, PostgreSQL, and AWS. Strong experience in backend architecture, performance optimization, production support, incident management, and leading modules from design through production deployment. Proven ability to mentor engineers, collaborate with stakeholders, and deliver reliable high-performance systems.

SKILLS

Messaging & Integration: Apache Kafka, ActiveMQ (AMQ), Kong API Gateway, Resilience4j

Databases & Caching: PostgreSQL, MySQL, Oracle, Redis, Aerospike

Testing: JUnit 5, Mockito, Cucumber(BDD), Integration Testing

Frontend: Angular 8, HTML5, CSS3, Bootstrap

AI Tools / GenAI Framework: GitHub Copilot / Cursor AI and Basics of RAG / Vector DB /Spring AI concepts.

Cloud & DevOps: AWS(EC2, RDS, S3, IAM, EKS, SQS), Docker, CI/CD(Jenkins), Observability (Splunk), Maven/Gradle, Git

Backend & Frameworks: Java (8, 11, 14, 17), Multithreading, Concurrency, Spring Boot, Spring MVC, Spring Security (JWT/OAuth2), Spring Data JPA, Hibernate, Spring Batch, Spring Cloud, Spring Cloud Gateway,

Architecture & Design: Microservices, Clean Architecture, Domain-Driven Design, Event-Driven Systems, RESTful API Design, High Availability, Fault Tolerance, Scalability, Distributed Systems, HLD, LLD, System Design

Process & Delivery: Agile, Scrum, Sprint Planning, Technical Roadmap, Stakeholder Management, Cross-functional Teams, Technical Documentation

WORK EXPERIENCE

Senior Engineer Iris Software - Contributed to migration of enterprise applications to Kubernetes (AWS EKS), enabling containerized deployments and improved horizontal scalability, high availability, and deployment consistency across environments. - Designed and developed backend services using Java and Spring Boot; applied Agile/Scrum delivery practices throughout - Built document retrieval and semantic search RAG capabilities using Spring AI and vector search to explore Generative AI capabilities. - Developed REST APIs supporting conversational workflows and citation-based responses. - Collaborated with stakeholders to define technical solutions and roadmap and improve engineering practices. Tech Stack: Java 14, Spring Boot, Junit, Mockito, AWS, EKS, Cursor AI, GenAI, RAG, VectorDB	Jul 2025 - Present Gurugram, India
Module Lead Impetus Technologies - Led backend design and delivery for an enterprise Model Governance platform used for model certification, approval workflows, and compliance tracking. - Owned modules end-to-end — requirement analysis, System Design (HLD/LLD), development, testing, deployment, and production support - Designed highly available scalable REST APIs with strong validation, auditability, and role-based access controls. - Improved API response latency by 40% through PostgreSQL query optimization, index tuning, and strategic caching using Redis; improved fault tolerance through circuit-breaker patterns. - Led code reviews, design discussions, debugging sessions, and mentoring of cross-functional team of around 10 engineers through weekly design and code reviews. - Led sprint planning, stakeholder reviews, and technical documentation; ensured delivery aligned with business roadmap and compliance timelines. - Awarded Star of the Month (September 2024) for delivery excellence and team leadership. Tech Stack: Java 11, Spring Boot, Vert.x, PostgreSQL, JUnit 5, Mockito, Angular, Copilot	Jan 2024 - Jul 2025 Gurugram, India
Consultant Xebia IT Architects - Owned critical backend services supporting payment processing and inventory management systems. - Designed and implemented Kafka-driven asynchronous event workflows, decoupling core microservices and improving scalability and system throughput by ~35%. - Integrated Resilience4j circuit breakers and retry patterns to improve fault tolerance and service resilience across distributed payment flows. - Built secure REST APIs using Spring Security with JWT authentication and Kong API Gateway for centralized rate limiting and traffic management. - Implemented Aerospike caching, reducing database load and cutting average read latency for high-frequency inventory queries. - Awarded GEM Award (January 2023) for outstanding platform contribution. Tech Stack: Java 8, Spring Boot, Kafka, Aerospike, Oracle, Kong API Gateway, Spring Security	Oct 2022 - Jan 2024 Gurugram, India
Senior Analyst Accenture Developed microservices supporting banking transaction automation and BNPL workflow integration following Agile delivery practices.	Jun 2021 - Oct 2022 Noida

- Implemented Kafka-based event processing and batch workflows for transaction lifecycle management. - Achieved 80%+ unit test coverage across owned modules through comprehensive BDD test suites using Cucumber, JUnit 5, and Mockito. - Investigated and resolved production incidents, performing root cause analysis and reducing recurring failure rates.	
Tech Stack: Java 14, Spring Boot, Kafka, Spring Batch, Postgres SQL, Junit 5, Mockito, Cucumber	
Project Engineer	Nov 2017 - May 2021
Wipro Ltd	Noida, India
- Developed backend services for billing, payment, and credit collection platforms within telecom and financial domains. - Built secure APIs and batch processing solutions for recurring billing and collection workflows. - Investigated production incidents, performed root cause analysis, and implemented corrective actions to improve system uptime. - Collaborated with stakeholders to refine requirements and improve long-term maintainability of applications. - Optimized complex SQL queries for shipping reporting services, reducing report generation time by ~25%; improved concurrency in batch processing to improve throughput	
Tech Stack: Java, Spring Boot, MySQL, Batch Processing, REST APIs, Angular	
Software Developer	Jul 2016 - Sep 2017
Freelance	Bareilly, India
- Developed web applications for school management and business management platforms. - Designed backend modules, reporting functionality, and database integrations. - Built responsive user interfaces and optimized SQL queries for application performance. - Delivered enhancements and production fixes based on client requirements.	

PROJECTS

Model Governance Platform	Jan 2024 - Jun 2025
Client: American Express	
- Led backend development for model certification and governance workflows. - Designed APIs supporting artifact management, approvals, audit tracking, and compliance processes. - Ensured reliability, traceability, and maintainability through scalable service design.	
Tech Stack: Java 11, Spring Boot, Vert.x, PostgreSQL, Angular	
Retailer Inventory Management Platform	Oct 2022 - Jan 2024
Client: Airtel Payments Bank	
- Developed microservices supporting inventory ordering and card distribution processes. - Implemented Kafka-based asynchronous processing for workflow automation. - Improved throughput and latency through caching and database optimization techniques. - Secured APIs using JWT authentication and automated operational workflows through batch processing.	
Tech Stack: Java 8, Spring Boot, Kafka, Aerospike, Oracle, Kong Gateway	
BNPL Initiative	Jun 2021 - Sep 2022
Client: National Australia Bank	
Developed transaction automation services and contributed to BNPL workflow integration	
Credit Collection System	Jul 2019 - May 2021
Client: Grameenphone (Telenor)	
Built billing and collection services with batch processing and production support	
Shipping Reporting System	Dec 2017 - Jun 2019
Client: FedEx	
Developed reporting services and optimized query performance.	

AWARDS

Star of the Month by Impetus Technologies	Sep 2024
GEM Award by Xebia IT Architects	Jan 2023

EDUCATION

Master of Computer Applications	Jul 2014 - Jun 2016
APJ Abdul Kalam Technical University, Lucknow, UP, India	GPA: 71 %
Bachelor of Computer Applications	Jul 2011 - Jun 2014
MJP Rohilkhand University, Bareilly, UP, India	GPA: 66 %

LANGUAGES

Hindi (Native proficiency) • English (Full professional proficiency)
